

STUDY ON MEDICAL MARIJUANA AND ITS LONG-TERM EFFECTS IN OLDER ADULTS

Principal Investigator: Dr. Yan Wang, Dept. of Epidemiology, University of Florida

What is SMILE?

SMILE is a year-long research study monitoring health outcomes in **older adults** with **chronic pain**.

We are assessing changes in pain, emotional and physical functioning, quality of life, and aging in those **seeking medical marijuana** to manage pain and those using **other methods** of pain management.

ARE YOU ELIGIBLE?

- 50 years or older
- Have pain for 3+ months
- Smartphone access
- Not currently using medical marijuana
- Seeking OR not seeking medical marijuana treatment

Participation Involves:

- Baseline & 12-month visits: 3 hours
- Visits at 3, 6, & 9-months: 30 minutes
- Blood & urine collection
- Brief smartphone surveys
- Periodic FitBit use

Study Length & Location:

- 12 months
- Gainesville, FL & Jacksonville, FL

Compensation:

- \$580 + an additional \$200 to reimburse your medical marijuana physician visit
- FitBit Charge 5 fitness tracker
- Study merchandise
